

THE TEXAS A&M UNIVERSIT

COLLEGE STATION, TEXAS 77843-1

Office of the
Chancellor

July 6, 1983

The Honorable William J. Casey
Director of Central Intelligence
Washington, D.C. 20505

Dear Director Casey:

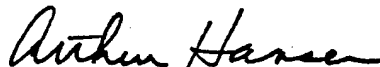

On Thursday, June 30, I was most fortunate to visit the Central Intelligence Agency, along with several colleagues, to receive a classified briefing related to science and technology transfer. The experience and content of this briefing were both superb and stunning. The situation is critically important to our national defense, as well as to our industrial leadership role.

The content of this briefing has prompted me to develop a reading file on the matter of technology transfer. I am certain I will have occasion to make reference to it in my academic, corporate, and defense-related activities.

In closing, I wish to comment on the high level of professionalism and expertise evident of our hosts. Dr. [redacted] served as our escort and liaison. We were briefed by [redacted] who was in turn assisted by [redacted] knowledge and ability in his field of endeavor were most evident.

Thank you for affording us with this tremendously informative experience.

Sincerely,

Arthur G. Hansen
Chancellor
